Subject: Windows Can't continue error

I seem to get all of the fun errors. It seems to be a big issue with Vista only. As when I run on XP it works so much better.

I am trying to write a simple wav audio recorder that works on vista, 7, and xp, windows. I don't need anything fancy it is just to record audio and that is it.

I am trying to use winmm.dll, and I put in several PromptOK to see what the return code was from the call to the dll. And I got it working, except when it came time to comment out all of my PromptOK, as you don't want that in production code.

When I commented out any one of a few PromptOK, I got the windows can't continue error. I have attached the code, and it has comments where if I comment out the PromptOK, I get the error message below:

Problem signature:
  Problem Event Name: BEX
  Application Name: WavRecord.exe
  Application Version: 0.0.0.0
  Application Timestamp: 4e621b13
  Fault Module Name: WavRecord.exe
  Fault Module Version: 0.0.0.0
  Fault Module Timestamp: 4e621b13
  Exception Offset: 0030794c
  Exception Code: c0000409
  Exception Data: 00000000
  OS Version: 6.0.6002.2.2.0.768.3
  Locale ID: 1033
  Additional Information 1: 69c4
  Additional Information 2: dd758875faf51299f67083fbdbfd7ade
  Additional Information 3: b50b
  Additional Information 4: 5abf68c400fbc9fd7560afb642c8d668

If I leave the PromptOK in I don't get the error, and it works just fine.

Any help with this one?

Thanks

David
