Thank you mirek!!
But i want it on the trayicon, I mean MenuBar not toolbar . Now I realize it works but with Right click.

Here is another version of my TrayIcon test.
In this project i try to override WinProc for TrayIcon to change
MenuBar action on WM_LBUTTOMDOWN.

The program run properly except when i want to use trayicon.

Where is it wrong

trayiconeV2::trayiconeV2()
{
...
 trayicon.WhenLeftDown = THISBACK(DoMenu);

```
}

void trayiconeV2::DoMenu()
{
 MenuBar::Execute(NULL, THISBACK(TrayMenu), GetMousePos());
}
```
