Hi,

I have a proposition to add buttons "Accept all" and "Reject all" to source updater in TheIDE (SvnSyncLayout). Right now it is easier to manually update upp sources that click a few hundred times in update window.

I have a proposition to add buttons "Accept all" and "Reject all" to source updater in TheIDE (SvnSyncLayout). Right now it is easier to manually update upp sources that click a few hundred times in update window.

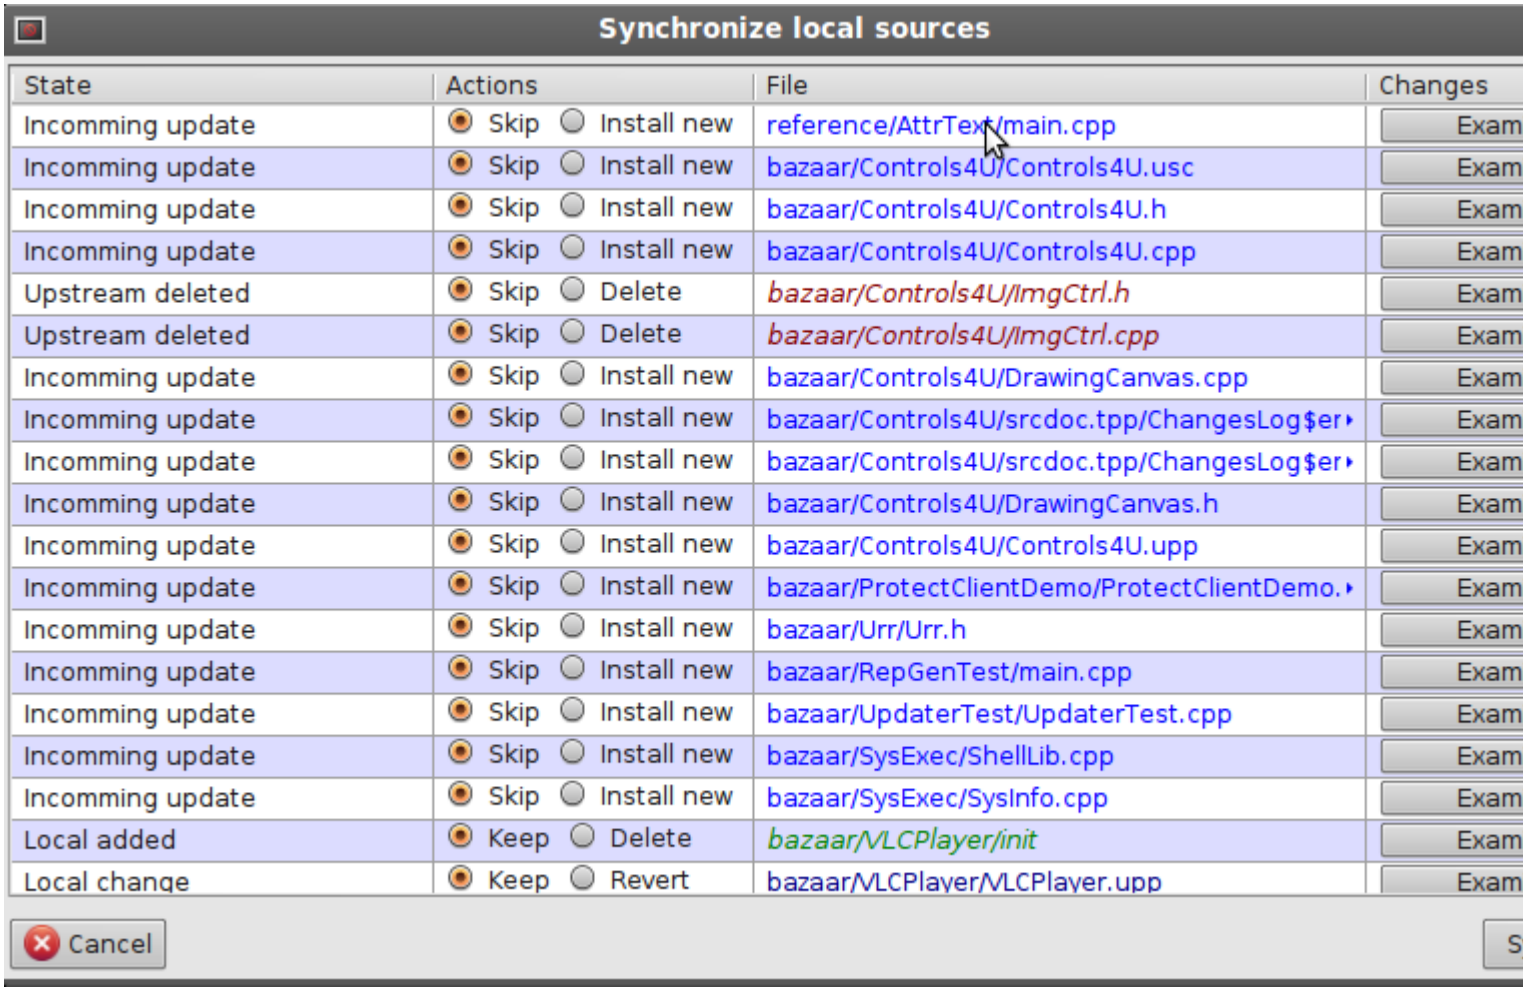

Do you mean "revert all", "commit all" and "skip"?

Mirek

I meant buttons that would change state of all radio buttons in "Actions" column.
