Subject: Installing upp in fedora 15
Posted by jpderyck on Mon, 26 Sep 2011 16:29:04 GMT

Hello,
I would like to install u++ in fedora 15, the rpm available is for fedora 14, it is not possible to install it because of a compatibility problem with the libnotify library, any idea ?
best regards
Jean-Paul

Hello,

you can download the source file (in svn ...X11..tar.gz) and compile it. I hope you can use a makefile.

Regards,
Luigi
