Hello Daniel

When copying GridCtrl rows I have a problem if some of the cells is colored.

To color a cell I do:

```
grid.Set(row, col, AttrText("Hello").Paper(LtRed));
```

When selecting and copying to the clipboard, I get this error:

It fails as this is true:  
Typemap().Find(type) >= 0

It is like there is a problem when inserting a AttrText in a Value.

It is inserted as a RawValueRep, type == 5 + 0x8000000

Hello Daniel

Now it runs but it does not copy column names (if CopyColumnNames() is used).

koldo wrote on Sat, 03 December 2011 17:37Hello Daniel

Now it runs but it does not copy column names (if CopyColumnNames() is used).  
Could you please paste a screensho here from your app before you press ctrl-c?

Hello Daniel

I do not know what happened, but now when copying rows with colors, the text inside cells is not copied.

Hello Daniel

There is other problem. The row ordering by clicking the header does not work well with colored cells.

In general it would be great if in GridCtrl it would be separated the cell value from the formatting. I think the AttrText() solution to insert formatting in cells is not ideal .

Hi Koldo!

I checked both problems in the latest version and for me everything is fine.. Maybe you could provide a test case with steps to reproduce.

Hello Daniel

This is the code:

```
#include <CtrlLib/CtrlLib.h>
#include <GridCtrl/GridCtrl.h>
```

```
using namespace Upp;
```

```
GUI_APP_MAIN
```

```
{
  TopWindow w;
  GridCtrl grid;

  grid.Clipboard().CopyColumnNames();
  grid.AddColumn("Data");
  grid.Add(AttrText("123").Center().Paper(LtGreen()).Bold());
  grid.Add(AttrText("023").Center().Paper(LtGreen()).Bold());
  grid.Add(AttrText("523").Center().Paper(LtGreen()).Bold());
```

```
w.Add(grid.SizePos());
```

```
w.Run();
```

```
}
```

The package is also included.

Thank you .

Thank you for a test case! My test was too simple to detect that . It's fixed now. I'll push out the changes in the evening.  
What about coping? Do you still have this problem? I'm not able to reproduce it..

Hello Daniel

Thank you!

The sample was to show the problems ordering and copying.

If I copy with that sample I can only get the column headers.
