Subject: Other problem with Clipboard in GridCtrl

Hello Daniel

When using CopyColumnNames(true) I do not get the column names copied.

I think the problem is in GridCtrl::SetClipboard(). The problem is solved just deleting a line (see code).
IMHO the header row cannot be selected, so I do not understand the reason of IsSelected() there:

```
for(int j = fixed_cols; j < total_cols; j++)
// if(all || IsSelected(i, j, false))
  tc += hitems[j].GetName() + '\t';
```

The idea behind was to copy only those columns for which selected cells exist. Unfortunately IsSelected here checked only first row instead of scanning all rows for particular column. Anyway it's fixed now Sorry for taking it so long.

Thank you Daniel

Now both problems (color cells copy and header copy) are fixed .
