The translation for apps\$de-de and Funding\$de-de was uploaded some days ago but if you view [http://www.ultimatepp.org/www\\$suppweb\\$app\\$de-de.html](http://www.ultimatepp.org/www$suppweb$app$de-de.html) and

[http://www.ultimatepp.org/www\\$suppweb\\$Funding\\$de-de.html](http://www.ultimatepp.org/www$suppweb$Funding$de-de.html)

you'll see the en-us version.

Something went wrong?!

Hi Wolfgang,

There is some glitch in the web generation mechanism... I uploaded some docs yesterday and they didn't appeared as well. I already noticed Mirek, mentioning also your missing translations (yes, I've seen the previous post about it). I'm sure he will investigate it and fix the issue soon.

Best regards,

Honza

Hello Wolfgang, hello Honza

There is a trick to be sure if the U++ web page is updated.

Open it and look for the date there:

The last updated has been on 12/02/2011 01:01:22 UTC.

Well, with addition of more topics, website generation mechanism, specifically, linking of www.tpp topics into binary, became unsustainable (not able to compile with 1GB of RAM).

I have reworked the code so that now topics are loaded, not linked.

Running the first attempt now...

Mirek

Good idea. Now it works.
