Subject: Drag and drop loses the text

Hi,

Something very useful in text editors is to select some text, drag it and drop it in a new place.

In Theide, when I do that, the text desappears

Works well however with the .tpp editor...

Could be related to my version : 4327-lucid-i386-nogtk/Linux Mint 9 (Isadora)

Should be fixed (in svn).

Mirek

Hi,

Sorry to be so late to answer...

Yes, working well with 4559-lucid-i386-nogtk/Linux Mint 9 (Isadora)

Thanks !

Hi,

The same kind of problem re-appeared since some versions (I'm using 7554 now). No more lost text, but impossible to drag and drop the selection.

I don't know since which version : I had been a long time not using Theide this year. I think that it was still working in March, but not sure...

This happens with Linux version, I don't know for Windows version that I never use.

Hi,

Working well with 7579.
