I need to display a number or objectname on top of a bitmap. I can't figure out how to get the text centered over the bitmap.

```
// Relevant portion of the code I wrote
void Furniture::Paint(Draw& d)
{
    switch (orientation)
    {
        case 1 : d.DrawImage(x,y,w,h,RotateClockwise(Img::Get(image))); break;
        case 2 : d.DrawImage(x,y,w,h,Rotate180(Img::Get(image))); break;
        case 3 : d.DrawImage(x,y,w,h,RotateAntiClockwise(Img::Get(image))); break;
        default: d.DrawImage(x,y,w,h,Img::Get(image));
}
d.DrawText(x+w/3,y+h/3,name,Arial(30), Magenta);
}

This is how I would do it. The gurus out here might have simpler ways to achieve the same

- 1- Get size of text to be displayed. You will use the GetTextSize() function to achieve this
- 2- Get the size of the rectangle using GetSize()
- 3- X position centered text will start at PosX = (Rect_X_extent-Text_x_extent)/2 PosY = (Rect_Y_extent-Text_Y_extent)/2

4- put the text there.

You might need to consider rotation of text differently.

Maybe there are utility functions that achieve the same, but, I do not know as I'm a relative newbie

Point p = rect.CenterPos(GetTextSize(...));
