Hi Everyone,

While I was learning the UPP, I came across a small problem. I wanted a WithDropChoice like Ctrl that should show options as I kept typing in the EditBox. What I didn't wanted was that when using WithDropChoice the focus shifts to the drop list. I wanted to control the list selection while remaining in EditBox.

DropGrid is great, but I wanted a simple ctrl for just values.
After reading the code of WithDropChoice, I came up with mine, WithAutoChoice. Right now its just in its initial stage cause I am still learning UPP.

I am attaching the code with example. Also I couldn't find a proper name for the Ctrl so I made up WithAutoChoice, Kinda matches with WithDropChoice.
