Subject: division by zero check
Posted by varu on Sat, 03 Mar 2012 09:22:21 GMT

hello

is there any way by which i can check division by zero
in u++

thanks

if(divisor == 0) ?

Other than that, no. Division by zero, when it happens, is asynchronous exception that is not handled by C++. You might consider using Win32 exceptions, but IMO it is a bad practice to relly on exception in this case. Division by zero is simply bug in code.
