Subject: How to change Tab name Posted by nixnixnix on Tue, 27 Mar 2012 23:05:57 GMT View Forum Message <> Reply to Message

Hi there,

Having looked through all the TabCtrl functions and examples and this forum, I cannot see where to change the name of a Tab once created.

There must be a way to do this right?

Just to be clear

```
...
towerDefs.Add();
CtrlLayout(towerDefs.Top());
towers.m_tab.Add(towerDefs.Top().SizePos(),"this is the name which I want to be able to
change");
```

where m_tab is a TabCtrl.

Cheers,

Nick

Hi Nick,

sure, it is possible I believe you can do it like this:

... towerDefs.Add(); CtrlLayout(towerDefs.Top()); towers.m_tab.Add(towerDefs.Top().SizePos(),"this is the name which I want to be able to change");

towers.m_tab.GetItem(0).Text("this is the changed text");
