"," missing in #define LLOG(x) LOG(x)

```
#include "Core.h"
```

```
NAMESPACE_UPP
```

```
bool HttpRequest_Trace__;
```

```
#ifdef _DEBUG
```

```
#define LLOG(x) LOG(x)
```

```
#else
```

```
#define LLOG(x) if(HttpRequest_Trace__) RLOG(x); else;
```

```
#endif
```

Apologies, I guess I should not have added totally development version to Core yet..

Mirek

I think I found one more bug in the new socket stuff... Since revision 4752 there is a \_\_stdcall attribute in Core/Web.h (line 33), which breaks compilation on Linux (it is MSVC only attribute, right?).

Fix is just to remove it or make it #ifdef PLATFORM\_WIN32

Best regards,  
Honza

PS: Unfortunately, I found also bunch of similar and other bugs in Socket.cpp. The latest changes probably don't compile on any other platforms than win32 Maybe it is time to set up some automated testing? It would sure caught a lot of mistakes like this...
