hi Novo-

I am very excited to check out the Firebird driver. I have kept an eye out from time to time to see if it would appear. I tell the people at work about Firebird. I recently did a report and used Helen Borrie's "The Firebird Book" in the sql editor in MS Access.

Did you know Helen is going to put out a book called "The Firebird Book second edition which will cover 2.5? I have the older one plus pdfs for 2.1.

I will tell my boss about this exciting development.

Firebird is now more in vogue because dBase is making a comeback. dBase will have more customers using FireBird through ADO.

Oh... one last thing.. the link is broken in the bazaar.

Thanks,
jim

Hi Novo-

Sorry, but the link still appears to be broken. If you click on the hyper-link that says Firebird "Functions4u" appears instead. I tried the link in a different browser too.

thanks,
mtdew3q

I changed uppbox/uppweb/www.tpp/bazaar$en-us.tppi. I guess we need to wait till web-site gets updated by a script.

Hi Novo-

I really like the sample code from the forum. It looks very RAD.
I can't wait to check it out.

Sorry I bothered you about the link. I thought the link was how it was downloaded and then after you fixed it, I read the whole bazaar is included with the IDE.

thanks,
mtdew3q
