Subject: Why qtfequations do not show properly?

I made a test for qtfequation in bazaar. It can't show mathematic symbols. BTW, I've converted the qtfequation.cpp to UTF-8 BOM encoding to avoid C2001 error.
Here is the code.
It's compiled by MSC10, run on Windows XP chinese.

Hello o_wild

Please include a screenshot of qtfequation in Controls4U_demo.

Hello o_wild

It should appear this:

Please check if you can see this in methods Sqrt() and Integral():
Drawing EquationDraw::Sqrt(Drawing &right)
{

Drawing EquationDraw::Integral(Drawing &data, Drawing &sub, Drawing &sup)
{

Uuups. It seems the mathematical graphic characters are lost in font...

I will try to solve this in next days. Instead of reading them from the font they will be inserted in the package directly.

Thank you .
