Subject: PolyXML Package changes
Posted by mdelfede on Sat, 26 May 2012 06:21:29 GMT

In prevision of creation of new polymorphic serialization templates, similar to PolyXML ones but using Json or binary serialization, I separated PolyXML package in 2 parts :

ClassFactory package, which provides the RTTI infrastructure for polymorphic serialization

PolyXML package, which provides the XML version.

Existing applications should run as before without need of changes.

Ciao

Max
