Gate MySqlSession::WhenReconnect is called when connection to DB is lost at the start of request, only at transaction level 0 (but Begin is request, so it can it).

MySqlSession::Reconnect reconnects DB with the same parameters as submitted to commit.

MySqlSession::AutoReconnect simply assigns Reconnect to WhenReconnect...

Hi Mirek,

Useful improvment for MySql developments. I was expecting that kind of feature.

Hello.
How to disable AutoReconnect? (I want control Reconnection myself on some conditions)
