Hi,

This is not a severe problem, but I thought I better report it anyway:

Everytime I scroll in Thelde, it creates three png's in my home folder named something like 3525.png, 3526.png and 3547.png.

The numbers change when Thelde is restarted or I switch Gui Theme in the menu.

The graphics is the images from the up, down and drag icons on the scrollbar.

If I delete the files, they are recreated as soon as I scroll again.

It could be a problem local to my installation. I don't see it on a 32-bit Slitaz installation.

My current installation is: Ubuntu 12.04 64-bit, Thelde 5021

If I change the layout to classic I get a different set of icons.
