RichText txt;
RichPara para;
//give some fmt and value to para
txt.Cat(para);

RichTextView view;
view.Pick(txt);

//then i want to give some new fmt and value to para
txt.Cat(para);
vew.Pick(txt); //it collapse!!!! how can i update new fmt??

yeah ,BioBytes,
i see the example, use SetQTF can do that

akebee wrote on Wed, 20 June 2012 07:09RichText txt;
RichPara para;
//give some fmt and value to para
txt.Cat(para);

RichTextView view;
view.Pick(txt);

Pick destroys the content of txt. That is why it does not work.

Try

RichText copy; copy <<= txt; view.Pick(copy);

Quote:
//then i want to give some new fmt and value to para
txt.Cat(para);
vew.Pick(txt); //it collapse!!!! how can i update new fmt??
