```
RichText txt;  
RichPara para;  
//give some fmt and value to para  
txt.Cat(para);
```

```
RichTextView view;  
view.Pick(txt);
```

```
//then i want to give some new fmt and value to para  
txt.Cat(para);  
view.Pick(txt); //it collapse!!!! how can i update new fmt??
```

Hi Akebee,

Perhaps you could have a look to :

[http://www.ultimatepp.org/reference\\$RichTextObject\\$en-us.htm](http://www.ultimatepp.org/reference$RichTextObject$en-us.htm) I

Have a nice day

Regards

Biobytes

yeah ,BioBytes,
i see the example, use SetQTF can do that

akebee wrote on Wed, 20 June 2012 07:09RichText txt;

RichPara para;

//give some fmt and value to para

txt.Cat(para);

RichTextView view;

view.Pick(txt);

Pick destroys the content of txt. That is why it does not work.

Try

RichText copy; copy <= txt; view.Pick(copy);

Quote:

//then i want to give some new fmt and value to para

txt.Cat(para);

view.Pick(txt); //it collapse!!!! how can i update new fmt??
