[View Forum Message](#) <> [Reply to Message](#)

```
All_Tables(sch);
if(sch.ScriptChanged(SqlSchema::UPGRADE))
    Sqlite3PerformScript(sch.Upgrade());
if(sch.ScriptChanged(SqlSchema::ATTRIBUTES))
    Sqlite3PerformScript(sch.Attributes());
if(sch.ScriptChanged(SqlSchema::CONFIG)) {
    Sqlite3PerformScript(sch.ConfigDrop());
    Sqlite3PerformScript(sch.Config());
}
```

I can't find it anywhere in the docs.
