Hello Mirek

Now LoadFromXML() catches only XmlError.

However if XmlizeByJsonize() is used, Jsonize() throws a JsonizeError. This way LoadFromXML cannot catch Json errors.

The solution would be just to replace catch(XmlError) {} with catch(...) {} in LoadFromXML().

catch(...) is too quirky IMO. I have rather used

```
template <class T>
void XmlizeByJsonize(XmlIO& xio, T& x)
{
    if(xio.IsStoring())
        StoreJsonValue(xio, StoreAsJsonValue(x));
    else {
        try {
            LoadFromJsonValue(x, LoadJsonValue(xio.Node()));
        }
        catch(JsonizeError e) {
            throw XmlError("xmlize by jsonize error: " + e);
        }
    }
}
```

please check..

Mirek
