Hello all

In TimeDate.cpp function GetTimeZoneText() there is a new warning easy to solve:

```
String GetTimeZoneText()
{
    Time gmtime = GetUtcTime();
    Time ltime = GetSysTime();
    int d = (ltime - gmtime) / 600; // Warning Time (int64) converted to an int
    return Format("+%02.2d%01.1d0", d / 6, d % 6);
}
```
