Hello,

I am trying to parse a 44 Mb text file in a console project. Each rows contains record like this
227965,2008.03,11907,2299,25055,2198,0.00

It seems that LoadFile and FileIn have problem to read it and the program crash. Is there some limit to the file size?
It looks strange as the same file in a gui program is loaded with LoadFile and set corectly in a LineEdit.

Thanks,
Luigi

(U++ 4603 with TDM-GCC).

Sorry,
false allarm... the error was in next line of my code... here is very hot weather

Luigi

Just for record, String is limited to 2GB - that limits LoadFile as well..
