Subject: U++ on ohloh.com
Posted by dolik.rce on Sat, 11 Aug 2012 09:19:11 GMT

Hi everyone,

Yesterday I read about ohloh.com adding new code search feature, so I headed to the page to check it. I noticed that the entire page now looks much better than I remember.

The U++ stats wasn't updated since about a year ago, so I fixed that and now we have up to date report there saying many nice thing about U++: https://www.ohloh.net/p/upp

Quote:... took an estimated 473 years of effort
I'd guess Mirek is responsible for at least 300y ot of that

Quote:Established codebase
The first lines of source code were added to Ultimate++ in 2008. This is a relatively long time for an open source project to stay active, and can be a very good sign.

Quote:Large, active development team
Over the past twelve months, 10 developers contributed new code to Ultimate++.

This is a relatively large team, putting this project among the top 10% of all project teams on Ohloh.

Quote:Stable year-over-year development activity
Over the last twelve months, Ultimate++ has not seen any change in activity. This is probably a good sign as development is continuing at the same pace and not dropping off.

I think this all gives a very good PR image of U++, which is unbiased (since it is automatically generated) and for free U++is even listed as similar project to Qt4 and Qt5, so it might drive some new users to it, which is always good.

Best regards,
Honza

Very good Honza

A link to keep in touch frequently.

maybe you can put the summary information on the homepage?
like for example exiv2 does.

grtz

Hello,

It seems that ohloh stops counting commits, becuse Google Code was shutdown. Honza can you
fix it one more time?

BTW, Ohlog is now OpenHUB.

Sincerely,
Klugier

Hi Klugier,

I have updated the repository information to point to the github mirror. The report should be now up to date, see https://www.openhub.net/p/upp.

Best regards,
Honza

Hello Honza,

Good job! Thanks for information.

Sincerely,
Klugier
