when I use MinGW (gcc4.6) to build Core to static library,I get the problem:Value.cpp | 168 | note:type was declared here .
The file is Value.cpp ,line 168 .How can I solve this problem,Thanks.
166 void Value::Serialize(Stream& s) {
167 sRegisterStd();
168 dword type;
169 if(s.IsLoading()) {

Hello Bluegrunt

I think you are not using the latest sources. I advice you strongly to do it. You can download them here.

Please tell us if this has solved the problem.

Hello Koldo,
I download the latest version and build it successfully.
Thank you very much .
