Hi there!
what happened between nightly build 5321 and 5336 with "uppsrc/web" and its contense ?

Can't find it integrated in other part either (core.h, etc)

Using Socket and ClientSocket(...)

Thanx
Ralph

It has been deprecated and removed. Core now contains TcpSocket and HttpClient, which (hopefully) are superior and event documented

Web will still be supported, but you now have to get sources directly from svn.
