
Subject: Is there a Zip/UnZip example?

Posted by [CppMod](#) on Sun, 23 Sep 2012 01:14:24 GMT

[View Forum Message](#) <> [Reply to Message](#)

I found the zip.h file, but I was looking for a complete example program that does zip and/or unzip. The threads in this forum are rather old, and have some broken links.

Anyone have some zip/unzip code they are willing to share?

Hi Howard,

In plugin/zip package are some handy classes for zip format. It can be used like this:

```
#include <plugin/zip/zip.h>
using namespace Upp;
```

```
CONSOLE_APP_MAIN{
// Compression
FileZip zip("/tmp/test.zip");
const char* somedata="some data";
String otherdata="other data";
zip.WriteFolder("test", GetSysTime());
zip.WriteFile(somedata, strlen(somedata), "somedata.txt");
zip.WriteFile(otherdata, "test/otherdata.txt");
if(zip.Finish())
    Cout() << "Zip created succesfully\n";

// Decompression
FileUnZip unzip("/tmp/test.zip");
while (!(unzip.IsEof() || unzip.IsError())) {
    Cout() << "Path:" << unzip.GetPath() << "\n";
    Cout() << " Time:" << unzip.GetTime() << "\n";
    if(!unzip.IsFolder()){
        Cout() << " Size:" << unzip.GetLength() << "\n";
        Cout() << " Content:" << unzip.ReadFile() << "\n";
    } else
        unzip.SkipFile();
}
}
```

Aside from FileZip and FileUnZip there are also in-memory variants StringZip, StringUnZip and MemUnZip that don't read/write files from disk. Their usage is very similar.

Best regards,
Honza

BTW, is there a possibility to make streaming unzip with FileZip or any other class? If original file is 1GB large, it is very memory consumable to unzip the whole file into memory.

```
bool  UnZip::ReadFile(Stream& out, Gate2<int, int> progress = false);
```

It is true that we now have more "modern" interface style for this (see Zlib class), but Stream& out should work as well...
