Hi Daniel,

This function does not appear to be present in version 5202 which is what I have installed.

Is there a reason for this please?

Nick

Hi Nick,

I use U5431 for Win32 and the method GridCtrl::SetDisplay(int r,int c, GridDisplay& gd) is still available.

Regards

Biobytess

I am currently using 5523,

Its declaration is available in GridCtrl.h file. But I think function is not there in GridBase.cpp

I use U5431 for Win32 and the method GridCtrl::SetDisplay(int r,int c, GridDisplay& gd) is still available.

I get compile time error. I could not locate the function in GridCtrl folder in any file.

Hi All

I added following function in GridCtrl.cpp

It looks like working.

```
void GridCtrl::SetDisplay(int r, int c, GridDisplay& gd)
{
    GetItem( r + fixed_rows, c + fixed_cols ).SetDisplay(gd);
}
```

Thanks Deep,

I didn't know how to go about arguing this one but what you found is the same as what I found.

Nick
