Searching the forum I came across a link for Connection-Oriented Socket Tutorial. But since this has been replaced, are there any quick tutorials and/or code samples I could reference?

thanks

reference/SocketClient
reference/SocketServer

Mirek

thanks for the reply

Those were some of the first socket tutorials I checked, but it has no reference to TcpSocket usage

Hello,

SocketClient and SocketServe reference TcpSocket since version 5382 of upp.

if you have an older version, you can get the last version (5484 today) here.

Regards

omari

thanks for the clarification Omari

I thought I installed the latest version, but it is version 4193
