Simple question: Is it possible to set font color of TreeCtrl? How?

I tried,

```
struct MyDisplay : public Display {  
    virtual void MyDisplay::Paint(Draw& w,const Rect& r,  
        const Value& q,Color ink,  
        Color paper,dword style) const  
{  
    w.DrawRect(r, paper);  
    w.DrawText(r.left, r.top, text, StdFont(), Blue()); // <- the color I want goes in here  
}  
};
```

...

```
TreeCtrl tree;  
tree.SetDisplay(Single<MyDisplay>());
```

...

but it does not work: I add items to tree, item text shows fine, but vanish when I SetDisplay(Single<MyDisplay>()). Am I missing something?

Thanks.

TreeCtrl is using

```
virtual Size GetStdSize(const Value& q) const;
```

method, you have to define it for your Display.

E.g.:

```
Size MyDisplay::GetStdSize(const Value& q) const { return StdDisplay().GetStdSize(q); }
```

On second thought, I have changed Display::GetStdSize to call StdDisplay::GetStdSize to avoid this confusion in future...
