Hi,

How can I change/redefine the default/predefined TabDlg
 background window/layout and everything that is on top of it?
The one that is behind the tabs.

I tried the following but it does not work.
It gives me an error that I am trying to redefine the TopWindow which is what I am actually trying
to do

TabDlg adminDlg;

//----------------------------
WithTabBackLayout<TopWindow> adminDlg;
//------------------------------

WithAdminLayout<ParentCtrl> tab1;
WithAdminRegNewUserLayout<ParentCtrl> tab2;
adminDlg (tab1, "Tab1")(tab2, "Tab2")
 .Title("Admin's Workspace")
 .Sizeable()
 .Zoomable();

adminDlg.Execute();

Thank you very much.

You can't.

TabDlg is highly specialized class dealing with the most common type of tab dialogs. If your dialog is not that common, it is better to to just create your own dialog and put TabCtrl into it.

Mirek

Mirek,

Thank you.

However, I tried and find it difficult to understand the TabDlg class.

I even redefined it as MyTabDlg and poked here and there, but it is tough for me still.

If you give me some tips I might be able to pick it up.

Best,
nejnio
