Subject: [FEATURE REQUEST] Horizontal Scrollbar for Console and Source Filename Sorting

Not sure if they already exist but I cant find them.

I think a Horizontal Scrollbar is needed for long lines debug texts in console screen. there is a option to wrap text but would much prefer the scrollbar instead. As keeping the like intact seems to lot easier to follow error messages.

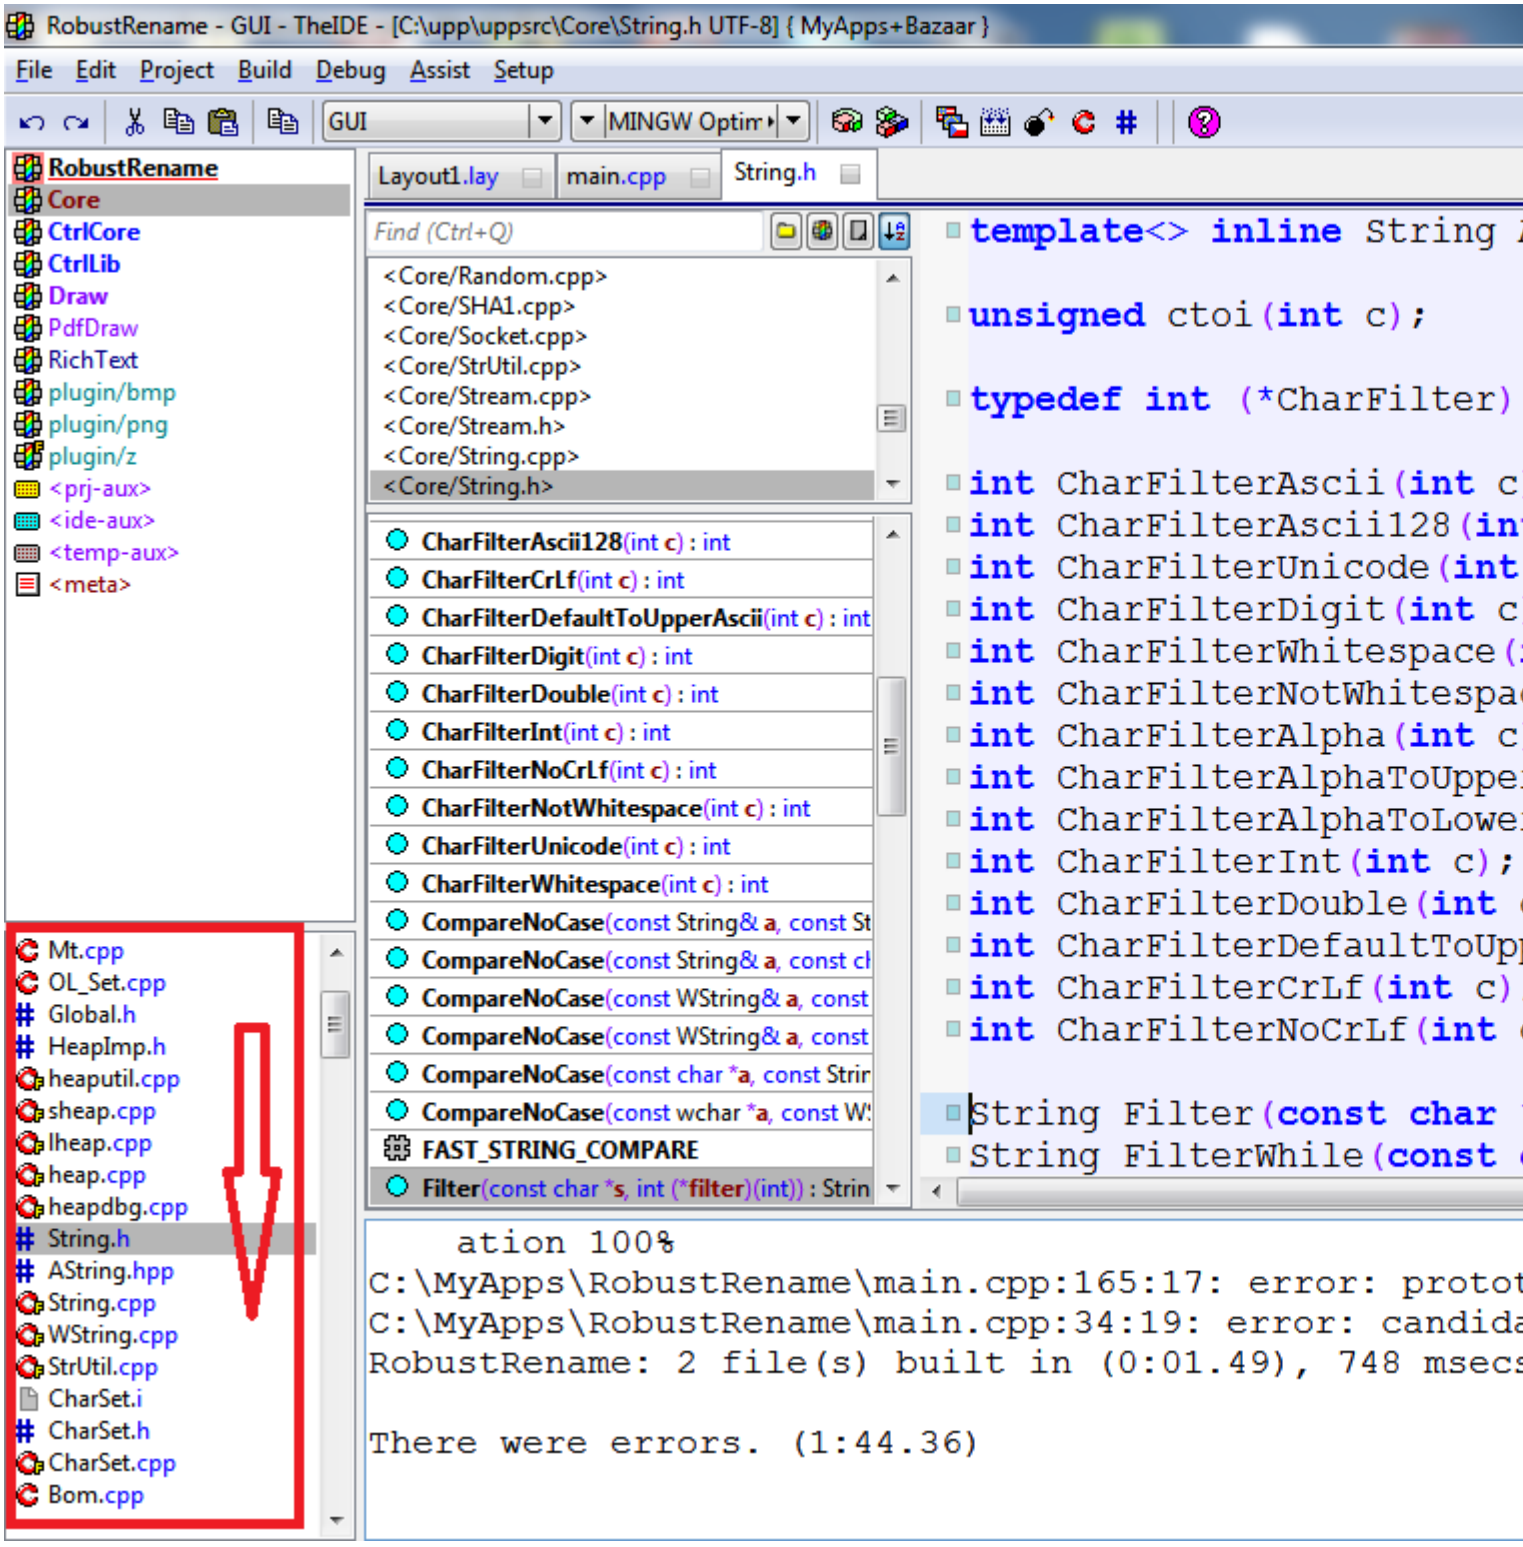

Second request is a "Sorting" ability for the source files list panel. If like a normal file browser, if we could sort the files by alphabetically, by type (.h, .cpp etc), by creation date and etc, it would be much easier to locate file in large package like "Core". I understand there is a "File Search" function in Edit menu. but "Sorting" ability will just make like easier.

Thanks & Regards

Navi

Just remember one more. A button for "Compile & Execute" next to the Rebuild All and Compile button on the toolbar would be so handy!! Compile and Execute option already exist under debug menu and Ctrl+F5 shortcut but a button a button on the toolbar would be perfect for 1 click.

Thanks & Regards

Navi

Hello Navi

I have the same opinion.

One More: In np++ there is an option of Ctrl+D to duplicate current line or duplicate the current selection of texts. In programming many are the times when the content of the current line are very simar to the next line. Just see the codes in screen caps above. in that sort of times it is lot easier to do a Ctrl+D and making the minor changes then to rewrite the entire line. A single shortcut Ctrl+D is much quicker and easier then doing a Ctrl+C, Enter, Ctrl+V. But unfortunately I could not find anything in the TheIDE shortcut key list. if it does not already exist, then it is the next item on my FEATURE REQUEST wishlist!

thanks & regards

I figured out a way to bring the "Compile & Excute" button on theIDE toolbar. Screen caps attached shows the codes that I changed. I guess theIDE always had the button on the toolbar except with a condition to only show if debugger installed. So I got rid of the condition and voila! the button appears!

This would be seriously my favorite thing to have ...
