Hi guys,
can I set different icons size in MenuBar ?

Thanks,
Matteo

no ideas?

I have found `bar.LeftGap(int)` to make gap larger but I am not able to resize icons.

regards,
Matteo

Hi Matteo,

Have you tried to just use bigger images as icons? IIRC, MenuBar will not try to upscale them on its own. I didn't test it, but it should work. Also there is `MaxIconSize()` method that can limit the size in case you use Images that are way too big.

If you have small icons and need them larger and you don't want to spend time with painting new ones, you can use `Rescale()` or `CachedRescale()` functions

Best regards,
Honza

thankyou Holza, bar.MaxIconSize() works!
