How can I change the window background color with Chameleon?

Thanks

Two alternatives:

```
GUI_APP_MAIN {
  // Define the colors you want to your window by calling the
  // many ::SColorXXX_Write(Color) functions before running
  // your app
  ::SColorFace_Write(Color(r, g, b));
  ::SColorText_Write(Color(r, g, b));
  ...
  MyApp().Run();
}
```

or override your window Paint method

```
  class MyApp : public TopWindow
  {
   public:
    MyApp() {}

    // Paint override
    void Paint(Draw& w) {
      w.DrawRect(GetSize(), Color(r, g, b)); // <= enter your background color here
    }
  };

GUI_APP_MAIN
{
  MyApp().Run();
}
```

Hello Lectus

You can also check StaticImage in Controls4U. It has a UseAsBackground() method that sets the image as background of the parent control.

You will see that it is very simple.
