Is it possible to send a QTF text to the printer (PrinterJob)?

Thanks

Nevermind.

Got it to work with:
Report r;
r << "some qtf text";
Perform(r);

BTW... what's the difference between Report and PrinterJob?

Hi Lectus,

Check this

 http://www.ultimatepp.org/forum/index.php?t=msg&goto=376
18&&srch=report+preview#msg_37618

You can use following functions / File <Report/ReportDlg.cpp>

Vars(Report,firstpage,JobTitle) This prints with printer selection dialog
bool Print(Report& r, int i, const char *_name)

Same as above but prints to default printer without dialog
bool DefaultPrint(Report& r, int i, const char *_name)

Thanks!

ReportView with those Print functions are a very cool combination for custom report printing!
