Hallo guys,

I have a little problem with DropDownList control into GridCtrl...

All seems going fine... i can open the dropdownlist and it shows me Values but when i select a Value or when i add a new row the GridCtrl shows me the Key.

I'd like it always show me Values... is it possible?

Dropelist:

```
void UMforza(DropDownList &dl)
{
    dl.Clear();
    dl.Add(1,"KN").Add(2,"daN").Add(3,"Kg").Add(4,"N");
    dl.SetIndex(0);
}
```
