Subject: Fixed Frame Size Dockable Controls

Hi,

I have been banging my head and can't figure out how to fix the frame size of a dockable ArrayCtrl.

DockLeft(Dockable(array, "Array").SizeHint(Size(300, 200)));

I looked at the reference examples and yes there is SizeHint(Size...), however this seems to be suggested size, but not fixed.

I need fixed size box/frame.

Thank you.

Best,
Georgi
