I'm trying something like this:

```
struct Person {  
    String n;  
    int a;  
  
    Person(String name, int age) {  
        n=name; a=age;  
    }  
};
```

Then I need to add persons like this:

```
VectorMap<int, Person> m;  
m.Add(1, Person("John", 30));
```

But it gives me compile error. Any ideas?

Found my answer here: http://www.ultimatepp.org/forum/index.php?t=msg&goto=23031&&srch=add+struct+to+container#msg_23031

It should be Moveable or use ArrayMap.

Sorry for this thread. I should have searched it before. You can delete it if you want.
