I guess that in 2012, U++ moved quite a bit forward, esp. in Core and web-related stuff. Personally, I consider Core finished for now (except bits of docs still missing).

In 2013, I believe we will finally move into supporting more platforms. I have now almost finished U++/gtk backend, so the next step is MacOS and/or Android.

Thanks everybody for participation in U++ project.

Happy New Year 2013!

Mirek

Happy new year Mirek!

Thanks for U++.

Skylark was a great feature in 2012. Looking forward Android support in 2013.

I own an Android phone, so I can do tons of testing.

Happy New Year everyone!

I wish 2013 to be even more C++-effective than 2012.

Special thanks to U++ authors team. You do a great job!

Hi all,

A very happy new year to everybody (health, happiness and a lot of projects developped with U++).

Special thanks to Mirek, Honza, Koldo, Daniel and many others for their implication in our preferred development tool (U++ of course!)

Happy 2013

Regards

Biobytes
