Hello,

I need to use a different color for the cursor of the GridCtrl. Is it possible to change it? I can't find a useful method.

Thanks,
Luigi

Hello,

All you need is just to override display of your GridCtrl.

First of all, we need to create display class:

```
class MyGridDisplay : public GridDisplay {
public:

   virtual void Paint(Draw &w, int x, int y, int cx, int cy, const Value &val, dword style,
       Color &fg, Color &bg, Font &fnt, bool found, int fs, int fe)
   {
      if (bg == SColorHighlight) {
         bg = Color(255, 0, 0); // <- Change background color to red.
      }
      GridDisplay::Paint(w, x, y, cx, cy, val, style, fg, bg, fnt, found, fs, fe);

      return;
   }

};
```

After that, we are going to use your display class:

```
GridCtrl grid;
grid.SetDisplay(Single <MyGridDisplay> ());
```

Let me know, If this code works.

Sincerely,
Klugier
