Subject: Can this be done through U++ and if so how?
Posted by localfriend on Sun, 20 Jan 2013 01:28:09 GMT

HI.
I am a beginner and just downloaded the program.
I am thinking of a program showing a drawing and want to slide another picture above it like a slide and overlapping the first one with half transparency so user can see the underlying one also. Anybody knows how to do this? any example like this?

Thanks.
