Subject: Respond to several Ctrl actions Posted by hmasr on Thu, 24 Jan 2013 09:27:29 GMT View Forum Message <> Reply to Message

I know how to change the default WhenAction for Ctrls. But what if I want to respond to several actions in the same class, like for example to have WhenLeftDown, WhenGotFocus, WhenMouseEnter, WhenMouseLeave, etc (of any Ctrl) available to the TopWindow class

Thanks in advance.
