Canonical search application developer for standard application! (for ubuntu-phone)

https://wiki.ubuntu.com/UbuntuPhone/CoreApps/

Let try this applications for ubuntu-phone on U++ !!!:

Calendar
Clock/Alarm
Weather
Calculator
Email Client
RSS Reader
File Manager
Document Viewer
YouTube
Facebook
Twitter
Terminal
Account Manager

U++ is better than standard Gnome-python application!(IMHO)

No!

PS.
with my bad English, if I sad something offensive - please explain...

Because, in fact, I admire the development team, and I'm sure if they put the goal - easily reached.
