Hi,

LOG keeps creating compressed logs regardless of LOG_ROTATE_GZIP flag. There should be additional LOG_ROTATE_GZIP flag check in Create function.

```
void LogOut::Create(bool append)
{
 Close();

 char next[512];
 for(int rot = options >> 24; rot >= 0; rot--) {
  char current[512];
  if(rot == 0)
   strcpy(current, filepath);
  else
   sprintf(current, rot > 1 && (options & LOG_ROTATE_GZIP) ? "%s.%d.gzip" : "%s.%d",
           filepath, rot);
  if(FileExists(current)) {
   if(rot == (options >> 24))
    FileDelete(current);
   else
   if((options & LOG_ROTATE_GZIP) && rot == 1 && !IsPanicMode()) //<<<---- "(options &
LOG_ROTATE_GZIP) &&" is missing
    SaveFile(next, GZCompress(LoadFile(current)));
   else
    FileMove(current, next);
  }
  strcpy(next, current);
 }
```
