Hi,

AWS Truepower are looking to employ someone full-time to help me on openWind development as well as some other in-house projects. The candidate must be prepared to relocate to Albany, New York (preferred) or Kelowna, British Columbia.

I am attaching our job description that is being posted elsewhere.

Cheers,

Nick

I am new to C++ and I have find out about this project only recently. I have tried Qt - mostly in Qt Creator IDE and some console stuff, obviously, Vaguely tried wxWidget but it was a pain to setup it on Ubuntu. So, installign Ultimate++ was extremely simple, there is a ton of examples and it feels good.
