Hi Wangdahu,

Which upp build are you using ? Under win 7, I am running 5878 version. If you delete the second

template function, the source file should compile without any error.

Let me know

Regards

under winxp sp3, 5928 vesion ,MSC10.
TheIde often output messy code about build info.
why? and how to solve

Thanks

Hi,

Sorry for late reply due to Eastern holidays. I suggest you update your system to UPP-5948 (last version if I am right) and it should solve the problem.

Regards

Biobytes
