The screenshot shows a C++ IDE with a code editor and a console window. The code editor displays the following code:

```
int x;  
RomanFoo(int x) : x(x) {}  
};  
  
namespace Upp {  
template <> String AsString(const RomanFoo& a) { return FormatIntR  
template <> String AsString(const BinFoo& a) {return FormateIntHex(  
};  
  
CONSOLE_APP_MAIN  
{  
FileOut fout(ConfigFile("test.txt"));  
String sout;  
  
fout << 1.23 << ' ' << GetSysDate() << ' ' << GetSysTime();  
sout << 1.23 << ' ' << GetSysDate() << ' ' << GetSysTime();  
  
DUMP(sout);  
  
sout.Clear();  
fout << "\r\n";  
  
sout << BinFoo(30) << ' ' << RomanFoo(30);  
fout << BinFoo(30) << ' ' << RomanFoo(30);  
}
```

The console window shows the following output:

```
Core05.cpp  
E:\upp\tutorial\Core05\Core05.cpp(21) : error C3861: 必须用FormatIntHex或FormatIntHex? 每句都报编译错误  
Core05: 1 file(s) built in (0:01.54), 1547 msecs / file, duration = 1547 msecs, parallelization 0%  
  
There were errors. (0:01.54)
```

Hi Wangdahu,

Which upp build are you using ? Under win 7, I am running 5878 version. If you delete the second

template function, the source file should compile without any error.

Let me know

Regards

Biobytes

under winxp sp3, 5928 vesion ,MSC10.

Theelde often output messy code about build info.

why? and how to solve

Thanks

Hi,

Sorry for late reply due to Eastern holidays. I suggest you update your system to UPP-5948 (last version if I am right) and it should solve the problem.

Regards

Biobytes
