Hello,

I have enclosed patch code (CtrlLib/DateTimeCtrl - line 309):

```
Image Calendar::CursorImage(Point p, dword keyflags)
{
 bool b = (selall == false ? Day(newday) > 0 : true);
 if((newday != nullday && b) || istoday)
  return Image::Hand();
 else
  return Image::Arrow();
}
```

Sincerely,
Klugier

In this particular case I am not quite sure that we want hand there.... These are not links.

Hello Mirek,

You are right I had similar idea in the past, but in this case I had fixed only cursor image.

Personally, I think that we should totally remove "hand" part. So the final code should look like this:

```
Image Calendar::CursorImage(Point p, dword keyflags)
```

```
{
    return Image::Arrow();
}
```

Sincerely,
Klugier
