I gave a try to new containers. I looks that interface functions are not completely finished. For instance using SortedVectorMap::GetAdd produce compile error with g++-4.7:

Core/InVector.h:578:72: error: 'At' was not declared in this scope, and no declarations were found by argument-dependent lookup at the point of instantiation [-fpermissive]

Core/InVector.h:578:72: note: declarations in dependent base 'Upp::SortedAMap<int, int, Upp::StdLess<int>, Upp::Slaved\_InVector\_\_<int> >' are not found by unqualified lookup

Core/InVector.h:578:72: note: use 'this->At' instead

Core/InVector.h:578:72: note: use 'this->At' instead

GCC 4.6.3 compiles it just fine, but I think I have identified the issue (and 4.7 is right).

Please try new svn version. Or replace GetAdd in SortedVectorMap with

```
T&    GetAdd(const K& k)                { return B::At(FindAdd(k)); }
T&    GetAdd(const K& k, const T& x)      { return B::At(FindAdd(k, x)); }
```

Thanks, now it compiles with g++-4.7 using latest svn.
